

DAC HDMI 4K TOFC 2.0

Overview

DAC'S High Speed **Ultra Slim** 4K TOFC 2.0 HDMI Cable is designed for those who demand both performance and flexibility. With its ultra-slim profile, this cable supports 4K resolution at 60 Hz and delivers a bandwidth of 18 Gbps, making it ideal for a wide range of audio-visual applications. Featuring a robust design and advanced features such as HDR support and 24K gold-plated connectors, this HDMI cable is perfect for enhancing your home theatre, gaming, or professional AV setup without the bulk.

Key Features

- **4K @ 60 Hz:** Delivers stunning 4K video with smooth frame rates, perfect for gaming, streaming, and cinematic experiences.
- **18 Gbps Bandwidth:** High-speed data transfer allows for exceptional video quality and audio fidelity.
- **HDCP 2.2 Compliance:** Ensures compatibility with the latest content protection standards for secure playback of 4K content.
- **HDR 10 up to 12-bit 4:4:4:** Experience rich colours and enhanced contrast for lifelike images and greater detail.
- **Audio Return Channel (ARC):** Simplifies audio management by allowing sound to be transmitted back to the receiver through the same HDMI cable.
- **3D Support:** Compatible with 3D content for an immersive viewing experience.
- **HPD & CEC Support:** Facilitates Hot Plug Detection and Consumer Electronics Control for easy device management and connectivity.
- **24K Gold-Plated Plugs:** Provides superior connectivity and resistance to corrosion, ensuring optimal signal transmission.
